## PROFESSIONAL SUMMARY

B.Tech Computer Science student with hands-on experience in Python, Java, and machine learning, including building and evaluating classification models and developing full-stack web applications. Skilled in data structures and algorithms, computer vision (OpenCV), and the MERN stack. Fast learner with a strong foundation in AI/ML fundamentals, seeking to apply technical and problem-solving skills to real-world software engineering challenges.

## EDUCATION

|                                                                                                                             |                    |
|-----------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>Vellore Institute of Technology — Andhra Pradesh</b><br><i>B.Tech in Computer Science &amp; Engineering   CGPA: 7.91</i> | <b>2023 – 2027</b> |
| <b>Sri Chaitanya Junior College</b><br><i>MPC (Math, Physics, Chemistry)   Percentage: 95.8%</i>                            | <b>2021 – 2023</b> |
| <b>MBHS School</b><br><i>Secondary School (10th)   Percentage: 99.5%</i>                                                    | <b>2020 – 2021</b> |

## TECHNICAL SKILLS

**Languages:** Java, Python, C, C++

**AI / Machine Learning:** Machine Learning fundamentals, Model Evaluation & Comparison, Computer Vision (OpenCV)

**Web Development:** HTML, CSS, JavaScript, React.js, Node.js

**Databases:** MySQL

**Tools & Platforms:** Git, GitHub, Google Colab, Jupyter Notebook, Kaggle, VS Code

**Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming

## PROJECTS

### Crop Recommendation System Using Machine Learning

- Built a machine learning model to recommend optimal crops using soil nutrient (N, P, K) and environmental parameters (temperature, humidity, rainfall, pH).
- Trained and compared five classification algorithms — Random Forest, SVM, KNN, Decision Tree, and Naive Bayes — to identify the best-performing model.
- Achieved 99%+ accuracy with the top-performing model, demonstrating strong applied understanding of supervised learning and model evaluation.

### Smart Plant Watering Robot

- Designed and built an automated plant irrigation system using Arduino and soil moisture sensors to optimize watering based on real-time soil conditions.
- Programmed embedded control logic to operate a water pump via a relay module, ensuring efficient, timely, and hands-free watering.

### Food Prep Frontend Website | [Link](#)

- Developed a responsive food-ordering website frontend using HTML, CSS, and JavaScript with a user-friendly UI.
- Implemented dynamic menu display, navigation, and interactive UI elements to improve overall user experience and usability.

## CERTIFICATIONS

- Modern Web Development with MERN Stack — [Certificate](#)
- Wadhvani Foundation IGNITE 3 — [Certificate](#)

## LANGUAGES

English, Urdu, Hindi, Telugu
